

Optowire Fitting Tools

Attachment point YK-H-03

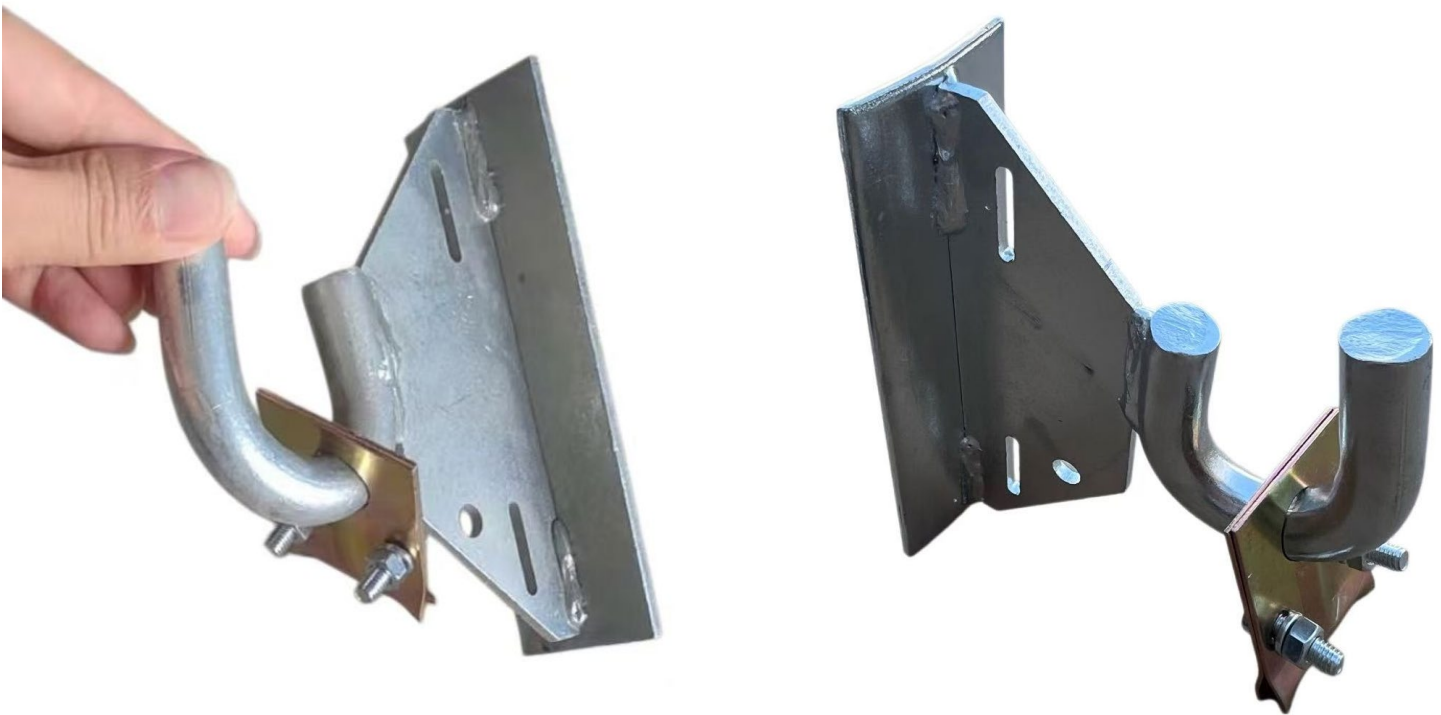

Optowire Attachment Point YK-H-03 is a robust wall-mounted anchor bracket designed for supporting and securing aerial fiber optic cables in FTTH and FTTx networks. Manufactured from high-strength Q235 steel with a hot-dip galvanized finish, it provides outstanding corrosion resistance and long service life in harsh outdoor environments. The rotating C-type hook allows more than 180° of movement, ensuring secure cable retention while preventing accidental disengagement caused by wind or vibration. Its reinforced riveted construction delivers excellent mechanical stability, making it suitable for both indoor and outdoor installations on walls, poles, and telecom infrastructure. The YK-H-03 offers a dependable anchoring solution for long-term fiber optic network reliability.

TECHNICAL SHEET

DESCRIPTION	DATA
Material	Carbon steel Q235
Treatment surface	Ur face treatment
Color	Silve-White
Floor Thickness	2.5 mm
