

Optowire Anchor clamp

Anchor clamp PA-05

The anchor clamp **PA-05** is designed to fasten and support the cable while ensuring the required tension of the cable line. The clamp consists of an open conical body, a pair of metal-toothed wedges (clamping device) and a flexible hinge. All parts are interconnected and cannot be lost. The clamp is installed in pairs at the beginning, end and with an interval of 5 supports along the length of the cable line. The anchor clamp provides a significant reduction in the duration of the cable suspension process.

TECHNICAL SHEET

Type	Anchor clamp PA-05
Material	UV resistant plastic, stainless steel
Loop Type	stainless steel(zinc)
Cable OD (mm)	3-7
MTL (kN)	2
Span (m)	60-80
Operating temperature(°c)	-40 ~ 50
Installation temperature(°c)	-20 ~ 50
