

Optowire Fitting Tools

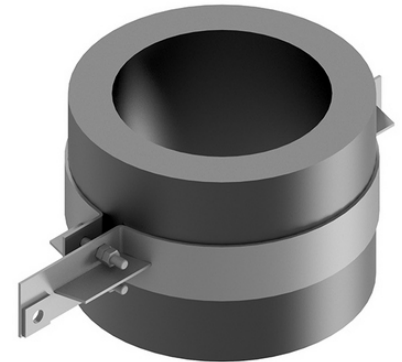

Pole Clamp

The hoop is used to fix the steel strand or wire on the pole, and the pull is similar to fixing to the wall or other objects to tighten the steel strand.

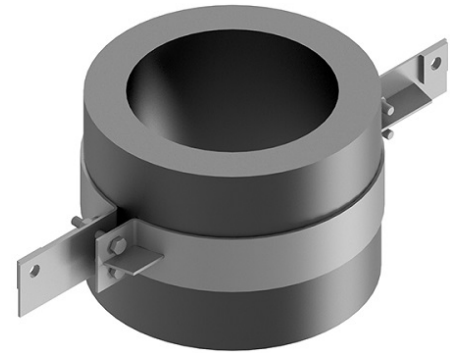

There are many types of hoops, cable hoops, telegraph pole hoops, cable hoops, cable hoops, and stainless steel hoops are more commonly used.

Cement poles can be divided into square, octagonal, I-shaped, circular or some other special-shaped cross-section poles according to their cross-sections.

Among them, the more commonly used are circular reinforced concrete poles.
