

Optowire Anchor clamp

Anchor clamp D6

Supporting clamps **D6** are used for suspending self-supporting ADSS optical cables and “8” type cables on intermediate and corner supports of overhead power lines, communications, urban electrical facilities (street lighting, ground electric transport), elements of buildings and structures with span lengths of up to 100 meters and route rotation angles of up to 25°.

TECHNICAL SHEET

Type	ODWAC
Material	UV resistant thermoplastic
Cable type	Oring
Cable OD (mm)	4-7
MTL (kN)	0.6
Span(m)	≤ 50 m
Operating temperature(°c)	from - 40 °C to 50 °C
Installation temperature(°c)	from - 20 °C to 40 °C
