

## Optowire Anchor clamp

### Anchor clamp VS-O-HY

Anchor clamps **VS-O-HY** are designed to securely fasten cables to supports. Clamps are installed at the beginning and end of the route, at its turns. In addition, clamps can be used at several points in the middle of a long straight section, in places of significant tensile load on the cable, when there is a difference in the heights of the attachment points, etc. The main parameters of the anchor clamp are the diameter of the clamped cable of the self-supporting cable and the maximum tensile force

## TECHNICAL SHEET

<b>Type</b>	<b>VS-O-HY</b>
Material	<b>Steel &amp; UV resistant thermoplastic</b>
Cable type	<b>Flat</b>
Cable OD (mm)	<b>Heigh-2 ; Width-6</b>
MTL (kN)	<b>0.8</b>
Span(m)	<b>≤ 50 m</b>
Operating temperature(°c)	<b>from - 40 °C to 50 °C</b>
Installation temperature(°c)	<b>from - 20 °C to 40 °C</b>
