

Optowire Fitting Tools

Eye To Eye Type Turnbuckle T-30-01

Turnbuckle are also called turnbuckles, rigging, and wire buckles, which are used to bind and fasten steel wire ropes. The Turnbuckle is used to tighten the wire rope and adjust the tightness. OO type is used for occasions where disassembly is not frequent, CC type is used for frequent disassembly occasions, and CO type is used for occasions where one end is often disassembled and the other end is not frequently disassembled. According to different process forming methods, it is mainly divided into three types: cast malleable steel, ordinary carbon steel, and forging.

Product Description

Item	DATA
Material	Q235 steel
Treatment Surface	Electronic plating galvanized
Size (mm)	M16×250
Inner eye diameter (mm)	20
body length (mm)	250
Threaded diameter (mm)	16
Closed length (mm)	340
Extended length (mm)	480
Unit weight (kg)	0.7
